

THE FAST AND EASY WAY TO BUILD POWERFUL AND RELIABLE PHP APPLICATIONS

Delphi for PHP revolutionizes web development with a completely integrated, rapid visual development approach and component framework for PHP. The proven and familiar RAD approach means you are quickly up to speed and productive. The powerful PHP editor, debugger, and profiler increase coding speed and efficiency. Connectivity with leading databases including MySQL, Oracle, Microsoft SQL Server, PostgreSQL and InterBase is seamless, and the integrated VCL for PHP component class library helps developers quickly and visually create PHP web applications and easily integrate PHP, JavaScript/AJAX open source code and components.

Visualize and easily navigate your PHP application with the Structure Pane

Use the Object Inspector to easily set properties and generate events for PHP objects

Quick access to the profiler, messages, debugging info, searches, data and more

The Project Manager simplifies the management of files in your PHP project

Use the Data Explorer to manage data and database connections

Easily switch between code and design views of your PHP applications and web pages

The Tool Palette provides access to drag-and-drop VCL for PHP components

File	Hits	Avg Time (ms)	Total (ms)	Min (ms)	Max (ms)	Path
transactions.php(28)	1	2.507	2.507	2.507	2.507	C:\Program Files\CodeGear\Delphi F...
transactions.php(29)	1	0.004	0.004	0.004	0.004	C:\Program Files\CodeGear\Delphi F...
transactions.php(30)	1	0.007	0.007	0.007	0.007	C:\Program Files\CodeGear\Delphi F...
transactions.php(31)	1	0.004	0.004	0.004	0.004	C:\Program Files\CodeGear\Delphi F...
transactions.php(32)	1	0.004	0.004	0.004	0.004	C:\Program Files\CodeGear\Delphi F...

THE ONLY PHP DEVELOPMENT SOLUTION WITH DRAG-AND-DROP VISUAL DESIGN

Only Delphi for PHP provides both code and design views of PHP applications in the IDE. The design view of the application and enables the developer to build user interfaces, database connections and more by dragging and dropping components from the Tool Palette onto a form. Properties and events can be set via the Object Inspector and changes to properties such as font, color and size are immediately reflected in the design view.

VCL FOR PHP COMPONENT LIBRARY COMBINES THE BEST OF OPEN SOURCE WITH THE EASE OF VISUAL DEVELOPMENT

Delphi for PHP utilizes an integrated PHP 5 class library called VCL for PHP. VCL for PHP is open source and accommodates virtually any PHP source code, framework, or library as designable and reusable visual components. Simply place the components into forms and use them in your applications. VCL for PHP components have built-in properties, methods, and events that make web interface development a snap. VCL for PHP is completely extensible, making it simple for you to develop new classes and components.

COMPREHENSIVE INTEGRATED PHP DEVELOPMENT ENVIRONMENT WITH EDITOR, DEBUGGER AND PROFILER

A sophisticated editor and debugger can make the normally frustrating process of tracking down bugs and errors in the code quick and painless. Delphi for PHP has a customizable source code editor that has color syntax highlighting, bookmarks to ease navigation through large files, and Code Insight to assist in the selection of properties and methods. The integrated debugger helps find and fix errors, view breakpoints, and local and global variables. And Delphi for PHP's new integrated profiler makes it simple to find performance bottlenecks in your PHP Web applications.

DELPHI® for PHP 2.0

Datasheet

Integrated Development Environment

Enhanced and Faster! Integrated visual PHP form and HTML designers including new templated HTML/PHP forms	>>
Two-Way-Tools automatically synchronize code between editor and form designer	>>
Object Inspector for visual customization of PHP and AJAX components without writing code	>>
Code Explorer to simplify PHP source code navigation	>>
PHP Project Manager to view and organize project files	>>
Structure Pane shows the hierarchy of components displayed on the designer	>>
Enhanced! Support for international encodings and character sets	>>
New! IDE localization in multiple languages including Spanish, Brazilian Portuguese, Japanese, German and Simplified Chinese or add your own localization and share it with the Delphi for PHP community	>>

Visual Component Library for PHP (VCL for PHP)

Enhanced! Customizable palette of more than 75 reusable components	>>
Standard components for frames, menus, buttons, checkboxes, radio buttons, scroll bars, panels, action lists, validation	>>
Enhanced! Advanced components for image button, flash object, image list, rich edit, progress bar, calendar, tree view, timer, web services, PEAR data grid, jQuery and many more	>>
Enhanced! Database components for accessing databases, tables, queries, and stored procedures, as well as data grids and navigation plus native database components for MySQL, InterBase and Oracle	>>
New! VCL for PHP components for the Zend Framework	>>
Extend the VCL for PHP at any time with third-party libraries or with your own custom components	>>

Database Application Development

Data Explorer to browse database server-specific schema and objects	>>
New! Support for additional databases in the Data Explorer including Oracle, Microsoft SQL Server, MySQL, PostgreSQL, DB2, Sybase, Informix, SQL Anywhere and InterBase	>>
New! Drag and drop from the Data Explorer to the visual designer to create-data driven apps with no coding	>>
New! VCL for PHP native database components for Oracle in addition to InterBase and MySQL	>>

Powerful PHP and HTML Editing

Customizable PHP source code editor with color syntax highlighting	>>
New! Code folding for simplified viewing of source code	>>
Code Insight to assist in the selection of properties and methods	>>
New! Error Insight provides syntax checking as you type	>>

Integrated PHP Debugging and Profiling

Integrated PHP debugger helps find and fix errors	>>
View breakpoints, local variables and global variables	>>
New! Integrated PHP Profiler to help locate performance bottlenecks	>>
