

	Multilizer Enterprise	Multilizer P for Develop	Multilizer P for Docume	Multilizer P for Translat	Multilizer for Translat
■ General functionality					
Create localization project	●	●	●		
Support any number of files to localize in one project	●	●	●	●	●
Share translation work between project managers and translators	●	●	●		
Translate project	●	●	●	●	●
Build localized files	●	●	●	●	
Automate tasks from command-line	●				
■ Supported development Languages and Platforms					
Microsoft Win32 Applications (EXE, DLL, OCX, etc.)	●	●			
Microsoft .NET Application resources (ResX) and project or solution files.	●	●			
Visual Studio .NET Smart Device Application projects	●	●			
Borland Delphi/C++Builder binaries (EXE, DLL, OCX, etc.)	●	●			
Java (J2EE, J2SE, J2ME)	○				
.NET assemblies (EXE, DLL, ...)	○				
Delphi .NET projects (.bdsproj, .bdsgrout)	○				
JBuilder project files	○				
VB 6 project; VB binaries	○				
eMbedded VB project	○				
Palm applications and overlay files	○				
Symbian files (.loc)	○				
RC files	○				
XML and derivatives	●		●		
HTML	●		●		
Custom text files; parsing based on <i>simple rules</i> or <i>regular expression engine</i> .	●		●		
Excel spreadsheets	○				
Powerpoint files	○				
Dita	○				
XLIFF	○				
Report Builder files	○				
Database contents (Oracle, SQL Server, DB/2, etc.)	○				
SQL Server 2005 database	○				
Your own software, document, or data format	☆				
■ Visual Editors					
Visual Dialog Editors for Windows binaries (PE) – Theme aware	●	●		●	●
Visual Menu Editors for Windows binaries (PE)	●	●		●	●
Built-in editors for bitmaps, icons, and cursors (for PE resources)	●	●		●	●
Dita preview	○			○	
Visual editor for your format	☆				
■ Wizards and Localization Process Automation features					
"Localization 1-2-3"Expert.	●	●	●		
Project Wizard	●	●	●		
Localization templates – use configuration templates to instantly set up new projects.	●				
Import & Export Wizards	●	●	●		
Exchange Wizard; share translation work by language, or by objects.	●	●	●		
Batch Validation with advanced reporting.	●	●	●		
Batch pre-translation.	●	●	●		
Command-line utility	●				
■ Productivity features					
Quick filter	●	●	●	●	●
Advanced filtering	●	●	●	●	
Find & Replace	●	●	●	●	
Spell check	●	●	●	●	●
Annotate native strings	●	●	●	●	●
Annotate translated strings	●	●	●	●	●
Report & statistics	●	●	●	●	
■ QA Features					
20+ automatic localization quality checks – <i>Quick fix</i>	●	●	●	●	
Translation Validation	●			●	
Pseudo language, cover/expand/minimum tests for UI elements.	●	●	●	●	
Run localized software directly from MULTILIZER.	●	●	●	●	
Lock/unlock feature at translation unit level	●	●	●	●	
■ Multilizer Language Expert					
Configure any number of translation importer sources.	●	●	●	●	
"Quick translate" – Multilizer automatically displays translations for selected native string.	●	●	●	●	
Prioritize translations by translation source or match percentage.	●	●	●	●	
Import from tmx, txt, xliif, tbx, Borland Translation Repository.	●	●	●	●	
Import from Excel spreadsheets	○			○	
Import from Machine Translation webservice – automated translation of your project	○			○	
Import translations from your translation format	☆			☆	
■ Interoperability and Integration					
TRADOS Translator's Workbench	●			●	
■ Integration / application developer features					
Delphi/C++Builder classes for binary localization.	●	●			
J2ME classes enabling property-file localization	●	●			
Multilizer Localization Components for VCL – for Delphi and C++Builder developers	●	●
